Professional Experience

Associate – IT Support May 2026 – Present
NSW IT Support, Sydney

- Supported end users by resolving hardware, software, and network-related incidents across Windows 10/11 and Windows Server environments.
- Managed Microsoft 365, Active Directory, and Entra ID administration including onboarding, password resets, and access management.
- Troubleshot DNS, DHCP, VPN, and connectivity issues for remote and onsite users to minimise downtime and improve user experience.
- Performed system installations, maintenance activities, updates, and IT ticket resolution within SLA-driven support environments.

IT Support Technician Apr 2025 – Apr 2026
IMI Solutions (Client: NSW Department of Education), Sydney

- Delivered desktide and field-based IT support across multiple education sites by resolving hardware, software, networking, and AV incidents.
- Deployed and configured laptops and desktops using PXE boot, imaging technologies, and Microsoft Intune during ICT rollout projects.
- Supported classroom AV and videoconferencing systems including projectors and interactive displays to maintain uninterrupted operations.
- Managed IT asset tracking, deployment documentation, and end-user support during device deployment and refresh activities.

IT Support Engineer(Professional Year Internship) Jan 2025 – Apr 2025
Skyline International College, Sydney, NSW

- Provided Level 1 help desk support through phone, email, and ticketing systems, resolving hardware and software issues efficiently.
- Troubleshot Windows, macOS, and ChromeOS devices while assisting with installations, configurations, and user support tasks.

- Escalated complex incidents to senior technicians while maintaining accurate ticket documentation and support records.
- Delivered customer-focused technical assistance in fast-paced service desk environments while following IT support procedures.

IT Support Officer

Dec 2023 – Jan 2025

Hospitality Services Australia Pty Ltd, Sydney

- Managed Microsoft 365, Exchange Online, and Active Directory user administration to support secure business operations.
- Reimaged, deployed, and configured desktops and laptops as part of device deployment and refresh activities.
- Resolved hardware, software, and connectivity issues while applying system updates, patches, and security configurations.
- Maintained IT documentation, backup procedures, and user support resources to improve operational efficiency.
